PROFILE

I am a recent MBA graduate with a strong background in business analytics and basic knowledge of data science. My MBA focused on using data to support business strategy, helping me gain skills in data analysis, data visualization, and decision-making. I worked with tools like Excel, SQL, and Tableau to draw insights and solve real business problems. I am dedicated to learning and applying data-driven solutions. To build on this, I am now pursuing an MS in Business Analytics at the University of Texas at Dallas to improve my technical skills and stay updated with current industry practices like predictive modeling, data mining, and machine learning.
